PROFESSIONAL SUMMARY

Highly adaptable IT professional and development leader with over 8 years of enterprise experience bridging software engineering, AI-driven automation, and IT infrastructure. Currently serving as Head of Application Development, specializing in Full-Stack Web Development (Next.js, ASP.NET Core), DevOps practices, and intelligent workflow automation.

Proven track record of architecting scalable applications, managing CI/CD pipelines in Azure DevOps, and orchestrating automated deployments to high-availability environments (IIS, Nginx). Experienced in designing automation solutions using n8n, integrating APIs, business processes, notifications, and AI-powered workflows to improve operational efficiency and reduce manual tasks.

In parallel, pursuing advanced work in Artificial Intelligence and Deep Learning, including research and development in computer vision, multimodal learning, and transformer-based architectures. Skilled in building AI pipelines, data processing workflows, and integrating machine learning capabilities into enterprise applications.

Brings deep foundational expertise in system administration, including enterprise virtualization (VMware ESXi, Proxmox), deployment of Windows Server and Linux environments on virtual and bare-metal infrastructure, and management of backup and disaster recovery solutions (Veeam).

Seeking a remote role where full-stack architecture, AI automation, DevOps, and resilient infrastructure converge to deliver scalable, intelligent, and business-driven digital solutions.

EDUCATION

PhD in Computer Science (IA and Deep Learning)

BADJI MOKHTAR Sidi Amar University

2019 – 2026

Annaba, Algeria

Master's Degree in Embedded Systems and Mobility

BADJI MOKHTAR Sidi Amar University

2016 – 2018

Annaba, Algeria

WORK EXPERIENCE

Head of Application Development Service

Algerian Solb

March 2023 – Present

Annaba, Algeria

- Lead a team of developers in the end-to-end design, development, and deployment of web, mobile and desktop applications.
- Architect and deploy scalable, full-stack web solutions, utilizing Next.js for responsive frontends and ASP.NET Core for robust RESTful APIs.
- Implement and manage Azure DevOps solutions to streamline the software development lifecycle.
- Configured and managed CI/CD pipelines in Azure DevOps to automate the deployment of ASP.NET Core and Next.js applications directly to highly available IIS and Nginx web servers.
- Provisioned and optimized web hosting environments using IIS and Nginx, implementing reverse proxies, managing application pools, and configuring SSL/TLS certificates for secure public access.
- Establish code management protocols using Git and integrate comprehensive test plans to ensure application stability.

System Engineer

Algerian Solb

February 2018 – March 2023

Annaba, Algeria

- Deployed and administered Windows Server and Linux environments, configuring them both as virtual machines and directly on bare-metal physical servers.
- Managed enterprise IT infrastructure, including Windows Server deployments, Active Directory, Exchange, monitoring systems, and strict security policy enforcement via GPOs.
- Administered and optimized virtualization environments using VMware ESXi 7.0 and vCenter.
- Automated server deployment processes, significantly reducing infrastructure provisioning time.

Boudmagh Mounir

+213 657 803 762 | boudmaghmounir@gmail.com

- Developed and implemented custom scripts to automate redundant administrative tasks and generate comprehensive system reporting statistics.

IT Manager African Nations Championship (CHAN) and CAN U17

December 2022 – June 2023

Annaba

- Manage a team of 10 people.
- Network deployment (Wired and Access point).
- Collaborated with 'Algérie Télécom' to ensure stable internet connectivity across the stadium and dispatch resources where needed.
- Print and distribute the score sheet during the games (VIP and Media).
- Support and troubleshoot any IT problem in the stadium.

Application Developer & IT Consultant (Micro Enterprise Owner)

Amayas Tech | Freelance

- Developed and deployed custom, cross-platform Web, Mobile, and Desktop applications to meet specific client operational needs.
- Architected and implemented a complete, secure IT infrastructure, including the deployment of the network, servers, and management solutions.
- Engineered reliable IT environments by provisioning virtualized server infrastructure (VmWare ESXI / Proxmox VE) to host and support full (Windows Server/ Linux) architectures and domain deployments.
- Administered core IT services including DNS, DHCP, and GPO configurations, while integrating centralized NAS storage and establishing comprehensive backup solutions.
- Integrated physical security and smart systems, including IP surveillance cameras, Security and fire alarms networks, and Domotic systems.
- Designed and implemented enterprise AI solutions using Ollama, Retrieval-Augmented Generation (RAG), and n8n to automate document intelligence, AI-powered helpdesk operations, knowledge retrieval, and business workflows while ensuring secure on-premises deployment.

IT Teaching Instructor

Annaba, Algeria

Various Institutions

- Instructed technical courses on C# and ASP.NET Core at ALSOLB.
- Taught programming and infrastructure fundamentals, including Python, C, SQL, WordPress, and VMware vSphere at university and private technical schools.

PROJECTS

Project Title | Skills Used

- **Payroll & Career Management System** integrated with Biotime Time Managemnt | Next.js, ASP.NET Core API, SQL SERVER, POSTGRESQL.
- **Corporate Web Portal & Mobile** Integration | ASP.NET Core MVC, Flutter, SQL SERVER.
- **Alsolb IA – Enterprise Private AI Assistant** | Ollama, Gemma 4, ASP.NET Core, SQL SERVER, RAG, Prompt Engineering.
- **AI Helpdesk Automation Platform** | n8n, Ollama, GLPI, Microsoft Graph API/IMAP, ASP.NET Core API, REST API, AI Automation, Workflow Automation.
- **Human Action Recognition Application** | Python, TensorFlow, Keras, OpenCV.
- **Data fusion for Human Action Prediction** | TensorFlow, Keras, PyTorch, OpenCV, ONNX, Postgresql
- **Industrial Safety Multi-Agent AI Platform** | TensorFlow, PyTorch, OpenCV, Transformers, YOLO, Ollama, LLMs, Multi-Agent Systems, ASP.NET Core API, PostgreSQL, ONNX.
- **Call for tender's web application** | ASP.NET CORE MVC, SQL SERVER.

TECHNICAL SKILLS

Languages | C#, Python, TypeScript, JavaScript, SQL, C

Frameworks | ASP.NET Core (MVC & Web API), Next.js, Flutter, Node.js

Infrastructure & Virtualization | VMware ESXi vCenter 7.0, Proxmox VE, Windows Server 2019, Active Directory, Exchange, Linux (Centos/Redhat), Cisco Routing/Switching, Veeam Backup.

Boudmagh Mounir

+213 657 803 762 | boudmaghmounir@gmail.com

DevOps & Cloud: Azure DevOps, CI/CD Pipelines, Git version control, Docker, Automated Testing, Nginx, IIS (Internet Information Services).

Artificial Intelligence & Automation | TensorFlow, PyTorch, Keras, OpenCV, Transformers, RAG, Ollama, Local LLM Deployment, Prompt Engineering, AI Agents, n8n, ONNX, Vector Databases (pgvector/Qdrant), Computer Vision, Multimodal Learning, Workflow Automation.

LANGUAGES

- English: Upper-Intermediate / Professional Working Proficiency (IELTS B2)
- French: Advanced / Professional Working Proficiency (TCF Canada: C1 Comprehension, B2 Expression)
- Arabic: Native
