PROFESSIONAL SUMMARY

Highly adaptable IT professional and development leader with over 8 years of enterprise experience bridging software engineering and IT infrastructure. Currently serving as Head of Application Development, specializing in Full-Stack Web Development (Next.js, ASP.NET Core) and DevOps methodologies. Proven track record of architecting scalable applications, managing CI/CD pipelines in Azure DevOps, and orchestrating automated deployments to high-availability web servers (IIS, Nginx). Brings deep foundational expertise in system administration, including optimizing enterprise virtualization (VMware ESXi, Proxmox), deploying Windows Server and Linux environments across virtual machines and bare-metal servers, and managing critical backup and disaster recovery solutions (Veeam). Seeking a remote role to leverage a comprehensive background in full-stack architecture, automated deployment, and system resilience.

EDUCATION

PhD Student in Computer Science (Deep Learning) **2019 – Present**
BADJI MOKHTAR Sidi Amar University Annaba, Algeria

Master's Degree in Embedded Systems and Mobility **2016 – 2018**
BADJI MOKHTAR Sidi Amar University Annaba, Algeria

WORK EXPERIENCE

Head of Application Development Service **March 2023 – Present**
Algerian Solb Annaba, Algeria

- Lead a team of developers in the end-to-end design, development, and deployment of web, mobile and desktop applications.
- Architect and deploy scalable, full-stack web solutions, utilizing Next.js for responsive frontends and ASP.NET Core for robust RESTful APIs.
- Implement and manage Azure DevOps solutions to streamline the software development lifecycle.
- Configured and managed CI/CD pipelines in Azure DevOps to automate the deployment of ASP.NET Core and Next.js applications directly to highly available IIS and Nginx web servers.
- Provisioned and optimized web hosting environments using IIS and Nginx, implementing reverse proxies, managing application pools, and configuring SSL/TLS certificates for secure public access.
- Establish code management protocols using Git and integrate comprehensive test plans to ensure application stability.

System Engineer **February 2018 – March 2023**
Algerian Solb Annaba, Algeria

- Deployed and administered Windows Server and Linux environments, configuring them both as virtual machines and directly on bare-metal physical servers.
- Managed enterprise IT infrastructure, including Windows Server deployments, Active Directory, Exchange, monitoring systems, and strict security policy enforcement via GPOs.
- Administered and optimized virtualization environments using VMware ESXi 7.0 and vCenter.
- Automated server deployment processes, significantly reducing infrastructure provisioning time.
- Developed and implemented custom scripts to automate redundant administrative tasks and generate comprehensive system reporting statistics.

IT Manager African Nations Championship (CHAN) and CAN U17 **December 2022 – June 2023**
Annaba

- Manage a team of 10 people.
- Network deployment (Wired and Access point).
- Collaborated with 'Algérie Télécom' to ensure stable internet connectivity across the stadium and dispatch resources where needed.
- Print and distribute the score sheet during the games (VIP and Media).
- Support and troubleshoot any IT problem in the stadium.

Boudmagh Mounir
+213 657 803 762 | boudmaghmounir@gmail.com

Application Developer & IT Consultant (Micro Enterprise Owner)
Amayas Tech | Freelance

- Developed and deployed custom, cross-platform Web, Mobile, and Desktop applications to meet specific client operational needs.
- Architected and implemented a complete, secure IT infrastructure, including the deployment of the network, servers, and management solutions.
- Engineered reliable IT environments by provisioning virtualized server infrastructure (VmWare ESXI / Proxmox VE) to host and support full (Windows Server/ Linux) architectures and domain deployments.
- Administered core IT services including DNS, DHCP, and GPO configurations, while integrating centralized NAS storage and establishing comprehensive backup solutions.
- Integrated physical security and smart systems, including IP surveillance cameras, Security alarms networks, and Domotic systems.

IT Teaching Instructor **Annaba, Algeria**
Various Institutions

- Instructed technical courses on C# and ASP.NET Core at ALSOLB.
- Taught programming and infrastructure fundamentals, including Python, C, SQL, WordPress, and VMware vSphere at university and private technical schools.

PROJECTS

Project Title | Skills Used

- Payroll & Career Management System integrated with Biotime Time Manangemnt | Next.js, ASP.NET Core API, SQL SERVER, POSTGRESQL.
- Corporate Web Portal & Mobile Integration | ASP.NET Core MVC, Flutter, SQL SERVER.
- Human Action Recognition Application | Python, TensorFlow, Keras, OpenCV.
- Data fusion for Human Action Prediction | TensorFlow, Keras, PyTorch, OpenCV, ONNX, Postgresql
- Call for tender's web application | ASP.NET CORE MVC, SQL SERVER.

TECHNICAL SKILLS

Languages | C#, Python, TypeScript, JavaScript, SQL, C
Frameworks | ASP.NET Core (MVC & Web API), Next.js, Flutter, Node.js
Infrastructure & Virtualization | VMware ESXi vCenter 7.0, Proxmox VE, Windows Server 2019, Active Directory, Exchange, Linux (Centos/Redhat), Cisco Routing/Switching, Veeam Backup.
DevOps & Cloud: Azure DevOps, CI/CD Pipelines, Git version control, Docker, Automated Testing, Nginx, IIS (Internet Information Services).
Libraries & AI | TensorFlow, Keras, OpenCV, Recurrent Neural Networks

LANGUAGES

- English: Upper-Intermediate / Professional Working Proficiency (IELTS B2)
- French: Advanced / Professional Working Proficiency (TCF Canada: C1 Comprehension, B2 Expression)
- Arabic: Native
